SPECTS 2018
2018 International Symposium on Performance Evaluation of Computer and Telecommunication Systems

http://atc.udg.edu/SPECTS2018/

July 9-12, 2018, Bordeaux, France

The goal of this annual conference is to provide a forum for researchers to discuss and disseminate the most promising contributions on performance evaluation of computer and telecommunication systems. Papers describing results of theoretic and/or practical significance are solicited. Experimental, modeling, and simulation studies are all in the scope of the conference. Working present novel performance evaluation methods or providing insights on design and runtime tradeoffs are particularly encouraged.

Accordingly, the conference will focus on, but will not be limited to, the following subjects of interest:

• Fault tolerance, signal and systems
• Data Center Networks
• Digital Circuit Design
• High performance I/O
• Memory systems
• Multi-core processors
• Machine to Machine systems
• Network management and performance evaluation
• Optical-Wireless communication and systems
• Visible light communications
• Internet of Things and enabling technologies
• Machine to Machine systems
• Device to Device communications
• Cyber Physical Systems
• Wireless ad-hoc Networks
• Wireless Sensor Networks
• Cloud Radio Access Networks
