

Gregg's Adage:

The simulator is the largest, most important capital investment in the training building. It should be treated as such at all times.

Excellence and DNP – NOT Mutually Exclusive!

- DNP does NOT mean do less or cut corners – it means be smarter, faster, more efficient in activities and decisions
- Examples:
 - Simulator Fuel Cycle Core Changes
 - Simulator Review Groups
 - Simulator model upgrades
 - Simulator facility upgrades
 - Installation of plant modifications in the simulator before the reference unit

The Corporate View

- Simulator O&M and Capital Investments
- Simulator software, hardware maintenance ownership
- Line ownership of simulator fidelity and performance
- Investing in multiple simulators per site
- Performance indicators
- Glass panel simulator use

Industry Experience

- Simulator Fidelity and Plant Events
 - Grand Gulf
 - EHC failure resulting in core oscillations (2016)
 - ADHR FW Isolation Valve (2016)
 - River Bend Feedflow Regulator Valves (2015)
 - Fermi modeling of core oscillations (2015)
 - Others?
- INPO ATVs and Plant Evaluations

Gregg's Adage:

The simulator is the largest, most important capital investment in the training building. It should be treated as such at all times.
