

SUMMERSIM'20

2020 Summer Simulation Conference

AIMS AND SCOPE

The **Modeling and Simulation as a Service (MSaaS) Track** is gaining momentum as an effective approach to bringing the benefits of service-oriented architectures and cloud computing into the arena of modeling and simulation (M&S), so as to enhance interoperability, composability, reusability and to reduce the cost of M&S efforts. We aim to bring together researchers and practitioners from academia, industry, defense and government to present experiences, innovative approaches, and smart solutions, as well as to discuss challenges that address service-oriented and cloud-based issues in the field of M&S and vice versa.
